THE GREEK REVIVAL

1807 SQ FT

This master down plan fits into the model found in turn-of-the century small towns with its front porch and symmetrical elevation. Inside, the plan offers a study on the first floor with the master, a large living room and both formal and informal dining. Upstairs are two more bedrooms and a bath. This plan can easily accommodate an attached garage at the side or a detached garage in the rear of the lot. The plan is documented with a crawl foundation.
